FOR IMMEDIATE RELEASE

Foremay Launches World's First 2TB 2.5" SATA SSD Drive

20 months after Foremay shipped the world's first 1TB SSD drives with a standard 2.5" SATA form factor in May 2011, the capacity has now been doubled to 2TB with a thickness of only 9.5 mm and with both commercial and industrial temperature ranges.

PASADENA, California – January 15, 2013 - Foremay, Inc., a leader of technology innovation in solid state drives and one of the world's Top SSD OEMs, today announced its 2TB SSD drives with a standard 2.5" SATA interface and a thickness of 9.5 mm. The 2 TB SSD drives are offered in Foremay's SC199 (for mission-critical applications) and TC166 (for terminal computing) product families. Users can opt for either industrial or commercial grade to suit their specific application. Foremay's 2TB drive is the largest SSD in the world today in standard 2.5" SATA form factor.

"By leveraging Foremay's patent pending technologies, we are proud to deliver the world's first 2TB SSD in standard 2.5" SATA form factor," said Jack Winters, Foremay's CTO and co-founder. "We hope our high reliability 2 TB SSD drives can help create more design freedom and storage space for both mission-critical and enterprise applications."

In additional to integrated flash management technologies such as Self-Monitoring Analysis and Reporting Technology (S.M.A.R.T.), Advanced Power Management (APM) and advanced error correction algorithm, Foremay's 2 TB SSD drive also provides optional features such as fast erase, military secure erase methods, hardware based encryption and conformal coating.

Product Availability

Both the 2TB SSD and 1TB SSD in 2.5" SATA form factors are in production now, offered at both industrial and commercial operating temperatures. For more information about the product offerings, please contact info@foremay.net

About Foremay

Founded in the Silicon Valley in 2002, Foremay, Inc., is a leading organization dedicated to technological innovation in Solid State Drives (SSDs) for highly reliable mission-critical computing, industrial computing, and enterprise computing. Foremay's vision is to bring reliable, rugged and high-performance solid state drives to the market with a "Green Initiative" in mind. Foremay is headquartered in Pasadena, California, USA.
