

FOR IMMEDIATE RELEASE

## Foremay® Ships World's Fastest SATA 3 SSD Drives

*Foremay's skinny flash SSD with a standard SATA 3.0 interface is now shipping in volume with read/write speeds up to 550/500 MB/s, read/write IOPS up to 70,000/35,000, and capacity up to 500 GB.*

**PASADENA, California – June 29, 2011 –** Foremay, Inc., a leader of technology innovation in solid state drive and one of the world's [Top 10 SSD](#) OEMs, today announced volume shipping of its SATA 6 Gb/s solid state hard drive in its [EC188](#) and [SC199](#) SSD product families. The new SATA SSDs come with standard host interfaces of third generation SATA, also known as SATA 3.0, SATA III, SATA 6 Gb/s, or SATA 600. Foremay's SATA 3 SSDs offer to the market the highest performance with a SATA interface, with sustained read/write speed up to 550/500 MB/s, and random read/write IOPS at 4kB file size up to 70,000/35,000.

"Our SATA III SSD is designed for high reliability industrial computing, enterprise servers and storage, and other high performance professional computing applications," said Jason Hoover, Foremay's Vice President Marketing. "With speed and IOPS performance double that of SATA II or SATA 2.6 SSDs but only a fractional increase in cost, our SATA 3.0 SSD significantly reduces the TCO (Total Cost of Ownership) for industrial and enterprise computing applications."

### About Foremay

Founded in the Silicon Valley in 2002, Foremay, Inc., is a leading organization dedicated to technological innovations in Solid State Drives ( SSDs ) for highly reliable, mission-critical computing, industrial computing, and enterprise computing. Foremay's vision is to bring reliable, rugged and high-performance solid state drives to the market with a "Green Initiative" in mind. Foremay is headquartered in Pasadena, California, USA.
